Dear Mr. Mace

Permit EPR/AB3101MW – Preston New Road Exploration Site – Pre-operational condition PO4

Thank you for submitting your Groundwater Monitoring Plan for Preston New Road, document reference HSSE-PLN-SITE-001 Issue 3 dated March 2016. We have reviewed this draft plan against what we require to meet the pre-operational condition, and are satisfied that this revised issue meets the requirements of your Permit for this site.

For informative purposes should the data collected during the installation of the monitoring boreholes prove that the conceptual site model needs to be amended the revision should be submitted with the report to be prepared for the approval of pre-operational condition PO7.

The Environment Agency would encourage discussion to take place prior to this submission should there be the need to make revisions to the conceptual model.

Yours sincerely

A handwritten signature in black ink, appearing to read "Steve Moylneux".
